

WATER FOR INJECTIONS FREEFLEX

Consumer Medicine Information

What is in this leaflet

This leaflet answers some common questions about Water for Injections. It does not take the place of talking to your doctor.

If you have any concerns about taking this medicine, ask your doctor or pharmacist.

Keep this leaflet. You may need to read it again.

What Water for Injections is used for

Water for Injections is sterile water used to dilute or dissolve drugs.

It can also be used for the washing small wounds and during minor surgical procedures.

Ask your doctor if you have any questions about why this medicine has been prescribed for you.

Before you are given Water for Injections

Water for Injections will only be used if it is clear, colourless and free of particles.

You should not be given Water for Injections after the expiry date printed on the pack, or if the packaging is torn, shows signs of tampering and if the solution is not clear.

It may have no effect at all, or worse, an entirely unexpected effect if you are given it after the expiry date has passed.

It must not be injected unless it has been used to dissolve or dilute necessary drugs to be administered by your doctor

or nurse.

Taking Other Medicines

Tell your doctor or pharmacist if you are taking any other medicines, including any that you buy without a prescription from your pharmacy, supermarket or health food shop.

Your doctor or pharmacist can tell you what to do if you are taking any of these medicines.

How is Water for Injections given

Water for Injections will be used to dissolve or dilute other drugs which may then be given by injection by your nurse or doctor.

Water for Injections is used to clean away dirt and blood from small wounds or cuts.

Storage

Storage

Water for Injections will be stored by your doctor or pharmacist under the recommended conditions.

It should be kept in a cool dry place where the temperature stays below 25°C.

Disposal

Any Water for Injections which is not used and which is left in the container, will be disposed of in a safe manner by your doctor or pharmacist.
