

# ALOXI

Palonosetron 250µg per 5 mL solution for injection

**Aloxi**<sup>®</sup>  
palonosetron HCl injection

## CONSUMER MEDICINE INFORMATION

### What is in this leaflet

This leaflet answers some common questions about ALOXI. It does not contain all the available information.

It does not take the place of talking to your doctor or pharmacist.

All medicines have risks and benefits. Your doctor has weighed the risks of you using this medicine against the benefits it is expected to have for you.

**If you have any concerns about being given this medicine, ask your doctor or pharmacist.**

**Keep this leaflet.**

You may need to read it again.

### What ALOXI is used for

This medicine belongs to a group of medicines known as serotonin (5-HT<sub>3</sub>) antagonists and is a colourless solution for injection into a vein.

It is used for the prevention of nausea and vomiting associated with cancer chemotherapy.

Your doctor, however, may prescribe this medicine for another purpose.

**Ask your doctor if you have any questions about why this medicine has been prescribed for you.**

### Before you are given ALOXI

#### ***When you must not be given it***

**Do not use this medicine if you have an allergy to palonosetron or any of the ingredients listed at the end of this leaflet.**

Some of the symptoms of an allergic reaction may include:

- shortness of breath, wheezing, difficulty breathing or a tight feeling in your chest
- swelling of the face, lips, tongue or other parts of the body
- rash, itching, hives or flushed, red skin

#### ***Before you are given it***

Your doctor must know about all of the following before you are given this medicine.

**Tell your doctor or pharmacist if you have allergies to:**

- any medicines
- any other substances, such as foods, preservatives or dyes

If you are pregnant or think you might be, your doctor will not use this medicine unless it is clearly necessary as it is not known whether it will cause any harmful effects when used during pregnancy. You should always ask your doctor or pharmacist for advice before using any medicine if you are pregnant or think you might be.

It is not known if this medicine is found in breast milk. You should ask your doctor or pharmacist for advice before using it if you are breast-feeding.

**If you have not told your doctor about any of the above, tell them before you are given this medicine.**

#### ***Taking or Being Given Other Medicines***

**Tell your doctor if you are taking any other medicines, including any that you buy without a prescription from your pharmacy, supermarket or health food shop.**

Some medicines may affect the way other medicines work. Your doctor or pharmacist will be able to tell you what to do when being given this medicine with other medicines.

### How ALOXI is given

This medicine is given as an injection into a vein. A doctor or nurse will normally inject it about 30 minutes before the start of chemotherapy.

Your doctor will decide how much of this medicine you will be given and for how long.

#### ***Overdose***

**As this medicine is given to you under the supervision of your doctor, it is very unlikely that you will receive too much. However, if you experience any side effects after being given it, tell your doctor immediately.**

### While you are using ALOXI

#### ***Things you must do***

**If the medicine starts to upset you or your symptoms become worse, tell your doctor.**

**Tell any other doctors, dentists, and pharmacists who are treating you that you are being treated with this medicine.**

**Tell your doctor, if you become pregnant during treatment with this medicine.**

#### ***Things to be careful of***

It is not known if this medicine has any effect on your ability to drive or use machines. You should be certain that you are able to drive and operate machines safely before you try.
