Medsafe

PO Box 5013

Wellington 6011

Medsafe is seeking comments on:

Proposed changes to format of correspondence

The respondent is supportive of the proposal to send correspondence in electronic format. However, there are potential security implications if confidential information is routinely sent unsecured via email. Would Medsafe consider using a secure email, or perhaps establish a secure portal that sponsors and Medsafe could each log into?

If email remains the preferred mechanism, it would be advantageous if multiple sponsor recipient email addresses could be specified.

Proposed changes to requirements for electronic submissions

Not applicable.

Additional Comments

Whilst recognizing that it is out of scope for this consultation, the respondent would be supportive of the use of electronic format being expanded in the future (for example, covering submissions and responses to RFI), whether that be via a secure portal, secure email or posting of a CD.

Please include additional pages if necessary.
