

Ondansetron Kabi

Ondansetron hydrochloride dihydrate

Consumer Medicine Information

What is in this leaflet

Please read this leaflet carefully before you use Ondansetron Kabi Injection.

This leaflet answers some common questions about Ondansetron Kabi Injection. It does not contain all of the available information.

It does not take the place of talking to your doctor or pharmacist.

All medicines have risks and benefits. Your doctor has weighed the expected benefits of you taking Ondansetron Kabi Injection against the risks this medicine could have for you.

If you have any concerns about taking this medicine, ask your doctor or pharmacist.

Keep this leaflet with the medicine. You may need to read it again.

What Ondansetron Kabi is used for

Ondansetron Kabi Injection contains a medicine called ondansetron. This belongs to a group of medicines called anti-emetics.

Ondansetron Kabi Injection is used to help stop the nausea (sick feeling) and vomiting which can occur after medical treatments and operations.

Ondansetron Kabi Injection should only be used to treat the nausea and vomiting for which it has been prescribed.

Your doctor may have prescribed Ondansetron Kabi Injection for another reason. If you want more information, ask your doctor.

Ondansetron Kabi Injection is not addictive.

Before you are given Ondansetron Kabi

Do not take if:

You must not take Ondansetron Kabi Injection if:

- You are taking apomorphine (used to treat Parkinson's disease).
- you have ever had an allergic reaction to ondansetron or any of the ingredients listed toward the end of this leaflet (See "Ingredients").
- you are pregnant, trying to become pregnant or breast feeding, unless your doctor says it is safe.
- the expiry date (EXP) printed on the pack has passed.
- the packaging is torn or shows signs of tampering
- the injection solution is coloured, cloudy or lumpy.

Tell your doctor if:

You must tell your doctor if:

- you are allergic to foods, dyes, preservatives or any other medicines.
- you have had to stop taking another medicine for your nausea or vomiting.

- you are taking any other medicines, including medicines you buy without a prescription.
- you have or used to have liver problems.
- you are breastfeeding, pregnant or trying to become pregnant.

Some medicines may affect the way others work. Your doctor or pharmacist will be able to tell you what to do when taking Ondansetron Kabi Injection with other medicines.

How Ondansetron Kabi is given

Your Ondansetron Kabi Injection must only be given by a doctor or nurse.

Sometimes other medicines are given at the same time.

Do NOT use the Injection on your own.

The clinical safety of Ondansetron Kabi in children under 2 years has not been studied.

While you are being given Ondansetron Kabi

Things you must do

Tell any other doctors, dentists and pharmacists who treat you that you are being given Ondansetron Kabi. Tell your doctor immediately if you become pregnant while you are

being treated with Ondansetron Kabi.

Keep all of your doctor's appointments so that your progress can be checked.

Things you must not do

Do not take any other medicines whether they require a prescription or not without first telling your doctor.

Side Effects

Check with your doctor as soon as possible if you think you are experiencing any side effects or allergic reactions due to taking Ondansetron Kabi Injection, even if the problem is not listed below.

Like other medicines, Ondansetron Kabi Injection can cause some side effects. If they occur, they are most likely to be minor and temporary. However, some may be serious and need medical attention.

The most commonly reported side-effects are:

- headache
- a sensation of warmth or flushing
- mild stomach cramps
- constipation or diarrhoea
- dry mouth
- hiccups

These are all mild side effects. There is no immediate reason to stop taking your Injection unless you are concerned.

Tell your doctor immediately if you notice any of the following:

- 'wheezy' symptoms
- chest pain or tightness of the chest
- changes in the way your heart beats, e.g. if you notice it beating faster or slower than normal, or if it beats irregularly or if it 'throbs'

- disturbances in heart rhythm (sometimes causing a sudden loss of consciousness)
- low blood pressure
- fits or convulsions
- swelling of the eyelids, face, lips, mouth or throat which may cause difficulty in swallowing or breathing
- skin rash, skin lumps or hives
- blurred vision
- dizziness

These are all serious side effects. You may need urgent medical attention. Serious side effects are rare.

This is not a complete list of all possible side effects. Others may occur in some people and there may be some side effects not yet known.

Do not be alarmed by this list of possible side effects. You may not experience any of them.

If your nausea (feeling of sickness) or vomiting does not go away, ask your doctor what to do.

In certain illnesses and treatments where Ondansetron Kabi has been used, blood vessel blockage has occurred. However, it is important to note that blood vessel blockage has also occurred in these illnesses and treatments when Ondansetron Kabi Injection has NOT been used. Discuss this with your doctor if you have any concerns.

If you feel unwell or have any symptoms that you do not understand, you should tell your doctor immediately.

After using Ondansetron Kabi

Storage

Ondansetron Kabi will be stored in the pharmacy or on the ward. The ampoules are kept in a cool dry place, protected from light where the temperature stays below 30°C.

Product Description

What Ondansetron Kabi Injection looks like

Each ampoule contains ondansetron in 2 mL or 4 mL clear aqueous solution.

Each pack will contain one, five or ten ampoules.

Ingredients

Each ampoule contains either 4 or 8 milligrams of the active ingredient ondansetron. Your doctor will decide which strength you need.

Ondansetron Kabi Injection also contain small amounts of citric acid, sodium citrate and sodium chloride.

Where to go for further information

Pharmaceutical companies are not in a position to give people an individual diagnosis or medical advice. Your doctor or pharmacist is the best person to give you advice on the treatment of your condition.
