Medsafe Performance Statistics

This page contains information about Medsafe's processing times for applications. For more information about the types of applications, see [Part 2: Obtaining approval for new and changed medicines and related products the Guideline on Regulation of Therapeutic Products in New Zealand](#).

[Key performance indicators](#)

[Reporting format](#)

[Medicine applications](#)

[Lower risk medicines \(N categories\)](#)

Key performance indicators

Medsafe's key performance indicators are the time in calendar days to complete initial evaluation for new medicine applications and changed medicine notifications (see tables 5 and 6).

Reporting format

Please note the following:

- The statistics below are for 6 months (ie, January–June).
- The reported timeframe also includes the previous year for comparison purposes.
- Medsafe collects its statistics in a different way from the Australian Therapeutic Goods Administration (TGA) and therefore the performance measures of each agency cannot be aligned or directly compared. Key differences include:
 - Medsafe performance measures and statistics are in **calendar days**, unlike the TGA which reports in **working days**
 - some measures reported by the TGA are not captured by the Medsafe database and therefore cannot be reported
 - the total time to completion includes **both** Medsafe evaluation and sponsor response times. The TGA only report TGA times in their total time to completion.

Medicine applications

Applications received and outcomes

Tables 1 and 2 show the number of medicine applications received each year by type and outcome.

Note that the number of applications received is different to the number of consents granted because the approval process may be longer than 12 months. Applications consented in any given year typically include a proportion lodged in preceding years.

Table 1: Number of medicine applications by type and outcome, Jan–Jun 2021

Application type	Received	Consented	Withdrawn	Refused
Higher risk	7	4	2	0

Requests for information (RFIs) received for consented applications

RFIs are requests for information from Medsafe to the sponsor. Tables 3 and 4 show the number of RFIs sent and responses received per consented application per year. See also tables 12 and 13 for lower risk medicines by category.

Table 3: Number of requests for information (RFIs) sent and responses received per consented application, Jan–Jun 2021

Application type	Number of RFIs

Processing and approval times

Processing and approval times are defined as the number of calendar days from the payment of an application until formal notification of a decision, unless otherwise specified.

These exclude times where Medsafe is unable to progress the application due to screening (which can include requests for information to make an application complete) or waiting for the payment of fees.

Medsafe calendar days include public holidays and weekends.

Only changed medicine notifications (CMNs) timeframes are mandated by legislation: CMNs must be completed within 90 calendar days of receipt of payment. If they are not resolved within this timeframe, CMNs are referred to the Minister under section 24(5)(b) of the Medicines Act 1981. [Indicative processing timeframes](#) are set for other activities to help monitor Medsafe's performance and efficiency.

Time to complete the initial evaluation

Tables 5 and 6 show the times (mean, median and range) for Medsafe to complete the initial evaluation by medicine application type per year. Target times for completion of the initial evaluation range from 45 calendar days for CMNs to 200 calendar days for higher risk medicines. Figure 1 shows the mean time for completion of the initial evaluation by medicine application type per year.

See tables 14 to 16 for lower risk medicines.

Table 5: Time in calendar days to complete initial evaluation, Jan–Jun 2021

Time to complete the evaluation of additional information (EAI)

The evaluation of additional information (EAI) measure is the time taken for Medsafe to evaluate the request for information (RFI) response from a sponsor. EAI1 is the time to evaluate the first RFI response and EAI2 is the time for the second RFI response. The EAI target times vary by application type, as shown in tables 7 and 8.

See tables 17 to 18 for lower risk medicines.

Table 7: Time in calendar days to complete evaluation of additional information (EAI), Jan–Jun 2021

a EAI1 is the time in calendar days to evaluate the first request for information (RFI) response received from the sponsor.

b EAI2 is the time in calendar days to evaluate the second RFI response received from the sponsor.

c CMN EAI times are not captured by the database.

Time to application consent

Tables 9 and 10 show the time in calendar days (mean, median and range) for Medsafe to consent (approve) an application per year. The time includes both Medsafe evaluation and sponsor RFI response times. As stated above, only CMNs have a target timeframe, which is 90 calendar days from receipt of payment.

Figure 2 shows the mean time to application consent by application type, for 2020 and January to June 2021.

Table 9: Time to application consent, Jan–Jun 2021

Lower risk medicines (N categories)

Lower risk medicines include those that are available without prescription, eg, they are available over-the-counter. Lower risk medicines are further categorised into application types: N1, N3, N4 and N5.

Note: Medsafe is reviewing the N categories to improve the indicative timeframes.

Applications received

Table 11: Number of lower risk medicine applications received (excluding withdrawn) by N categories, 2018 to Jan–Jun 2021

Year	N1	N3	N4	N5	Total

Processing times

Table 14 shows the key performance measure of initial evaluations, broken down by N category and by volume and percentage. Under 200 days is the target timeframe. Tables 15 and 16 show the time to complete the initial N categories evaluations, by category, each year, and tables 17 and 18 show the percentage of medicine applications that met the indicative timeframes each year.
